

Mock Interview Preparation Guide

Vertical: Coding

You will ace this round with these resources:

Live demonstration of a project to the interviewer on Scratch Website.

Go through the given Pdf Document to prepare yourself for the interview (attached below)

A Laptop is mandatory with good internet speed.

We make use of multiple platforms for the students to make them future ready for the upcoming challenges in Technology. Therefore a list of projects is enclosed herewith.

You can choose any one project from the given list and based on your understanding you can explain the same to the interviewer by creating a classroom environment.

If you wish you can feel free to use your own innovative ideas and you can create any new project and the demonstration of the same will also be fine.

It will just take a maximum of 4 hours for you to get ready with the project explanation

The interview duration will be 30 minutes.

Brightchamps Background

Scratch projects for Mock preparation:

To have knowledge of scratch platform, refer to this video- Scratch Platform

Reference Demo Video- BrightChamps Demo Class

Fruit Catcher- <https://scratch.mit.edu/projects/560050703>

Maze game- <https://scratch.mit.edu/projects/637149216>

Dino jump- <https://scratch.mit.edu/projects/556667790>

Hide and seek- <https://scratch.mit.edu/projects/637149598>

Alternatively, candidates can choose to demonstrate a small program using Python or HTML & CSS instead of Scratch. For these languages, no reference project is provided.

Candidates are expected to prepare a simple program that can be explained and demonstrated within 20- 30 minutes.
